Sora Arai

Osaka, Japan

araisora30@gmail.com

As a full-stack developer, Sora Arai has been collaborating with a variety of companies including small startups and big communities, which has made him intimately familiar with all the stages of the web lifecycle from the initial architecture to final deployment.

He is also not new to the remote freelancing scene, so he is extremely flexible with his working hours.

Apr 2013 – May 2017

Bachelor's Degree in Software Engineering

Osaka Prefecture University

- HTML/CSS
- Javascript
- Typescript
- jQuery
- PHP
- React
- GraphQL
- Vue
- Vuetify
- Node.js
- Laravel
- AWS Lambda
- MySQL
- PostgreSQL
- WebSocket
- Docker

Sep 2022 – Feb 2023

Full-stack engineer

Dental Sleep Solutions

- implemented several API endpoints using Laravel in a multiple-repository Docker project (microservices), tested heavily with Selenium and PHPUnit (unit tests and integration tests).

- migrated a great amount of PHP legacy code into a Vue.js single-page app using Vuex.

- Payments are done via Square and everything was connected to Xero for online accounting.

Mar 2021 – Aug 2022

Full-stack engineer

Routible

- Handled the devops server and database provisioning, scaling, and code deployment.
- Developed the back-end API with Laravel and front end with Vue.
- Built AWS Lambda functions with Node.js and configured an automated Git's pulling and deploying pipeline in AWS using Nginx, PM2, and Bitbucket webhooks.

Sep 2020 – Feb 2021

Vue Developer

Gofretes, Brazil

- Built beautiful and mobile responsive Vuetify UI components in Vue js.
- Fixed mobile responsive issue on server-side rendering in Nuxt.js using JavaScript packages.

June 2019 – May 2020

Front-end Engineer

Holidu, Munich, Germany

- Integrated Redux and MobX on the projects for the better state management of React components.
- Implemented a GraphQL-and-Apollo server for a React front-end data query.
- Created reusable React components for the date picker, dropdown, buttons, and input styles according to the provided designs.

Aug 2017 - Mar 2019

Software Engineer

Sotatek, Osaka, Japan

- Worked on Influencer marketing and E-commerce projects as a full-stack developer.
- Developed Rest APIs using PHP/Laravel.
- Implemented reusable and complex UI components with Javascript frameworks.
- Worked on providing API endpoints with Node.js/Express and MongoDB.

- Implemented various platform features with Django and PostgreSQL.
